Medley is new, as is the experience it gives you. The innovative, agile and lightweight high wheel scooter with the performance of a higher range is a harmony of opposites. Dynamic in traffic, easy to handle and compact but super spacious, it is also perfect for rides beyond the city limits. The high performance and innate class of the new design, available in a classic and a sporty version, enhance the thrilling and fun ride. The lines are dynamic, with the redesigned protective front end and the slender rear. Restyling was done on the ergonomic seat and the handlebar, which holds the new full-LED headlight and the digital LCD instrument cluster. Larger wheels with gritty rims and tons of refined details.

COMFORT AND TECHNOLOGY

Medley is unbeatable with its smart solutions that take the on board experience to a new level, maintaining intact the extraordinary carrying capacity of 2 full-face helmets. The new instrument cluster, entirely LCD, lets you keep an eye on all the vehicle's parameters. The headlight and the daylight running lights are full LED, for greater visibility and better safety, the exposed fuel cap on the central tunnel lets you refuel without getting off the vehicle. The spacious leg shield back plate compartment features a USB port and the retractable passenger footpegs make the trip even more comfortable.
